91%

Repeat business

Your client can't wait. Your team can't stretch.

Every agency hits the same wall — the brief is live, the deadline is real, and your internal capacity is already spoken for.

Can't hire fast enough

Recruitment takes 6–8 weeks. Your client's sprint starts Monday. The gap between timeline and headcount costs you the contract.

Freelancers are a gamble

No brand control. No quality guarantee. One disappearing act and your client relationship — built over years — is at risk.

Bench costs kill margin

Keeping engineers on retainer between projects is expensive. But staying lean means turning down work when capacity is tight.

Your client can never find out

You've built the relationship and won the trust. Bringing in a third party visibly puts all of that at risk.

Javixor is the invisible layer between your agency and your client.

01

Pre-vetted engineers

Every engineer passes rigorous technical screening across domain, communication, and timezone fit.

02

White-label by design

NDA's before day one. Brand-neutral SOWs. Your client sees only your team — never ours.

03

72-hour activation

From brief to engineer in your client's Slack in 72 hours. No recruitment pipeline, no delays.

04

Block-based pricing

Pay in advance blocks — 160 hrs/month or 40-hour fix blocks. No surprises, no scope creep.

Two models. Both on advance payment. No fixed-cost projects.

MOST POPULAR

Dedicated Engineer Block

\$2,800 / month

(More Than 12 clients currently working on this model)

160 hrs minimum • Advance payment

- ✓ Full-time embedded engineer
- ✓ Dedicated to your client project
- ✓ Daily stand-ups, sprint-based
- ✓ NDA + white-label SOW included
- ✓ Replacement within 48hrs if needed

FLEXIBLE

Hourly Fix Block

\$28 / hour

(Delivered more than 30+ QA Projects and Dev-ops
Deliveries for small fixes under 80 hours)

40 hrs minimum • Advance payment

- ✓ Scoped task or sprint delivery
- ✓ Ideal for one-off capacity gaps
- ✓ Structured brief + milestone sign-off
- ✓ NDA + white-label SOW included
- ✓ Scales to full blocks as needed

Whatever the brief requires, Javixor has the engineer for it.

Frontend

React • Vue • Angular • Next.js

Dashboard builds, SPA rewrites,
design-to-code

Backend

Node • Python • Java • Go • APIs

API architecture, integrations,
performance fixes

Mobile Apps

Flutter • React Native • iOS •
Android

App builds, mid-project rescues,
post-launch support

UI / UX

Figma • Prototyping • Design
Systems

Product design, rapid prototyping,
design ops

QA & Testing

Manual • Automation • Selenium
• Cypress

Release confidence, regression
coverage, CI/CD

Cloud & DevOps

AWS • GCP • Kubernetes •
Terraform

Cloud migrations, infrastructure,
pipeline builds

AI & Data

ML Pipelines • LLM Ops • Spark •
dbt

Model integration, data pipelines, AI
features

Firmware & Embedded

C/C++ • RTOS • ARM • Linux BSP

IoT builds, hardware integration,
embedded systems

Not a bench. Not a marketplace. A delivery partner.

Who Javixor works with.

1

Digital & Product Agencies

Agencies that win product briefs but need engineering surge capacity without exposing the model to their clients.

2

IT Consulting Firms

Consultancies that advise clients on tech strategy and need execution-ready engineers to deliver on the recommendations.

3

Managed Service Providers

MSPs that manage client tech stacks and need specialist depth — firmware, AI, cloud — without building internal practices.

4

Systems Integrators

SIs that take on complex integration projects and need specialist engineers embedded invisibly alongside their own team.

Brief to live engineer in three steps.

1

Submit the Brief

Share the domain, stack, timezone, and hours needed. Takes 5 minutes. No commitment required at this stage.

2

Engineer Match

Within 48 hours, Javixor presents a matched engineer profile — vetted, briefed, and ready to start.

3

Activate & Deliver

On acceptance, the engineer joins your workflow within 72 hours. NDA signed. White-label SOW in place. No friction.

JAVIXOR

Ready to extend your capacity without extending your headcount?

Send us a brief. We'll have a matched engineer profile back within 48 hours. No commitment required.
